Google Container Registry (GCR) provides secure, private Docker image storage on Google Cloud Platform. It provides a single place for teams to manage Docker images, perform vulnerability analysis, and decide who can access what with fine-grained access control. Existing CI/CD integrations let teams set up fully automated Docker pipelines to get fast feedback. Costs for use are based only on Google Cloud Platform storage and network usage.

GitLab also provides a container registry which is a built-in part of the product (ie. no extra costs beyond standard tiered licensing costs for the single GitLab application which provides capabilities for the entire DevOps lifecycle).

Feature Comparison

 Google
Container
Registry

FEATURES

Docker image support

CORE	STARTER	PREMIUM	ULTIMATE
FREE	BRONZE	SILVER	GOLD

Supports storage and retrieval of Docker style containers.

[Learn more about the GitLab container registry](#)

Container registry webhooks

CORE	STARTER	PREMIUM	ULTIMATE
FREE	BRONZE	SILVER	GOLD

Trigger actions after a successful push to a registry to integrate Docker Hub with other services.

[Learn more about GitLab registry webhooks](#)

Container registry high availability

CORE	STARTER	PREMIUM	ULTIMATE
FREE	BRONZE	SILVER	GOLD

Highly available through the use of multiple replicas of all containers and metadata such that if a machine fails, the registry continues to operate and can be repaired.

[Learn more about GitLab high availability](#)

Container Registry geographic replication

CORE	STARTER	PREMIUM	ULTIMATE
FREE	BRONZE	SILVER	GOLD

Supports distributed teams by running multiple registry instances across several regions and syncing between data centers.

[Learn more about GitLab replication](#)

Supports private container registries

CORE	STARTER	PREMIUM	ULTIMATE
FREE	BRONZE	SILVER	GOLD

Offers the ability to have private container registries and repositories

[Learn more about GitLab private container registries](#)

SaaS container registry offering

CORE	STARTER	PREMIUM	ULTIMATE
FREE	BRONZE	SILVER	GOLD

The container registry is available as a software service.

[Learn more about the container registry available on GitLab.com](#)

Self-managed container registry offering

CORE	STARTER	PREMIUM	ULTIMATE
FREE	BRONZE	SILVER	GOLD

Container registry which is available to be self-installed and self-managed in an organizations data center, co-hosted, or in a chosen cloud provider.

[Learn more about self-installing GitLab](#)

Use container registry through REST API

CORE	STARTER	PREMIUM	ULTIMATE
FREE	BRONZE	SILVER	GOLD

Enables support for automation and integration of container registry through a REST API.

[View the docs](#)

Lower the cost of storage for the GitLab Container Registry by running garbage collection

In the context of the Docker registry, garbage collection is the process of removing blobs from the filesystem when they are no longer referenced by a manifest.

[Check out the documentation, and get started today.](#)

Use search to find and container images

Search your group and project's Container Registry by image name

[Learn more about the GitLab Container Registry](#)

Helm chart repository support

Supports storage and retrieval of Helm charts.

Image Expiration policies

Easily define, manage and update project-level policies to define which images should be removed and preserved. This feature is designed to help you reduce storage costs and prevent important images from being deleted.
